Gabriel Oliveira

BACKEND-FOCUSED FULL-STACK DEVELOPER

Fortaleza, Brazil | gabrieloliv.dev@gmail.com | linkedin.com/in/gabrielolvv | github.com/gabrielolvv

Full-stack developer with stronger backend experience building APIs, automations and data-processing systems. Experienced with financial reconciliation, large-file imports, spreadsheet workflows, CNAB generation, portal automation and PDF extraction. Based in Brazil and open to remote international teams.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, JavaScript, PHP, Laravel, C#, .NET and REST APIs
Frontend: React, React Native and responsive web and mobile interfaces
Data: MySQL, CSV and Excel processing, PDF extraction and CNAB workflows
Cloud and Tools: AWS, S3, Lambda, API Gateway, CloudWatch, DynamoDB, Docker, Terraform and Git

PROFESSIONAL EXPERIENCE

Full-Stack Developer - South Wind Solution 2022 - Present
- Build and maintain web and mobile applications, integrate REST APIs, resolve production issues and improve responsive user experiences.
- Translate product and operational requirements into practical software across backend, frontend and mobile environments.

Cloud Infrastructure Developer - Contract Project 2023
- Developed infrastructure with Terraform and AWS, connecting TypeScript Lambdas, API Gateway, CloudWatch and DynamoDB.

React Native Developer - Freelance 2023 - Present
- Delivered a new flow for a banking application and resolved compatibility issues across Android devices and iOS.

SELECTED PROJECT

Prism Review - Open Source 2026
- Built a deterministic GitHub Action that reviews pull requests for missing tests, large diffs, dependency changes and security-sensitive files before human review.
- Designed a safe execution model with minimal permissions, unit-tested rules, fixture-based analysis and a single upserted pull-request report.
